Fortinet
Sunnyvale, CA

Dear Hiring Manager:

I am writing to express my strong interest in Software Developer(Web) at Fortinet. The idea of creating something that didn't previously exist and the joy of building something and seeing it come to life is what makes Web Development really awesome for me. So I want to contribute to web development in your company. With my skills and background, I am confident that I will quickly surpass your expectations for this role.

I have been developing web pages related to consumer-facing web applications in my Full Stack Nanodegree from Udacity. I developed content management systems using Flask framework in Python. I worked on the neighborhood map project where I used AJAX to get data from Foursquare and the JavaScript framework Knockout.js. I am proficient with Python and JavaScript libraries.

I built a portfolio website where I used HTML5 and CSS3. In my job at Robert Half Technology, I designed 10 web apps. I worked in testing web interface for routers and switches in Juniper Networks which will be helpful in testing websites that I have built. I led a team of 4 members in testing functionalities on new platforms. I mentored 2-4 new team members in my previous job at Juniper. I have good communication, working on teams, attention to detail, multitasking, performance, reusability, customer service and problem-solving skills.

I am confident that you will find my hands-on experience; qualifications and proficiencies make me an excellent candidate for the Software Developer(Web) at Fortinet. I am a capable and fast learner and pick up job quickly. Thank you for your time and consideration. Please let me know if there is anything further you need from me. I'm best reached by phone between 8:00 am to 3:00 pm and anytime via email.

Sincerely

Subadhra Srinivasan
